E5. Beyond the quadratic (15 instances; recommendation = lowest observed value, scored on noise-free f)
CMA-ES, full
CMA-ES, diagonal
BO, full metric
BO, ARD
BO, ARD, noise fitted (original)
Rosenbrock f8 (aligned)
Rosenbrock f9 (rotated)
κ = 100 quadratic, noise σ = 0.01
κ = 100 quadratic, noise σ = 1
median log10 f of the recommended point
objective evaluations
